Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

Reference is made to the following documents:

- D1 : EP 1 148 406 A (MITSUBISHI DENKI KABUSHIKI KAISHA) 24 October 2001 (2001-10-24)
D2 : PATENT ABSTRACTS OF JAPAN vol. 1997, no. 05, 30 May 1997 (1997-05-30) &
JP 09 026834 A (HITACHI MAXELL LTD), 28 January 1997 (1997-01-28)

Re Item V.

1 INDEPENDENT CLAIMS 1 AND 21

- 1.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.
Document D1 discloses all the features of claim 1 (the references in parentheses applying to this document):

An apparatus (fig. 1, ref. 1) comprising first (fig. 1, ref. 2) and second (fig. 1, ref. 3) components having respective first (fig. 4, ref. 8 on telephone body 2) and second (fig. 4, ref. 8 on module 3) mechanical coupling elements (see col. 13, lines 15-24) that cooperate to allow relative movement (see fig. 1: "rotate") of the first and second components,
wherein each of the first and second mechanical coupling elements provides a corresponding signal coupling means and the signal coupling means cooperate to enable wireless coupling of a signal from one of the first and second components to the other of the first and second components (see paragraph 26 and fig. 7A).

- 1.2 Similar reasoning can be applied to claim 1 starting from D2. The subject matter of claim 1 is thus also not new with respect to D2.
- 1.3 Similar reasoning can be applied to corresponding independent claim 21. The subject-matter of said claim is therefore also not new (Article 33(1) and (2) PCT).

2 DEPENDENT CLAIMS 2-13 AND 16-20

Dependent claims 2-13 and 16-20 do not contain any features which, in combination

with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty (Article 33(2) PCT) because the subject-matter of said claims is known from either D1 or D2 : see documents D1-D2 and the corresponding passages cited in the search report.

3 DEPENDENT CLAIMS 14 AND 15

Dependent claims 2-20 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step (Article 33(3) PCT) because ball and socket arrangement and sliding mechanical coupling are known in the art. The skilled person would regard it a normal design procedure to replace the hinge of document D1 by a ball and socket arrangement or a sliding coupling, thereby arriving at the device according to claim 14 or 15.

Re Item VII.

- 1 Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
- 2 Independent claims 1 and 21 are not in the two-part form in accordance with Rule 6.3(b) PCT.
- 3 The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
